José Pedro Kuhnen Sens

Full stack developer
Florianópolis, Santa Catarina, Brasil

Four years as a full stack developer, split between engineering teams and products of my own. I build and maintain web applications, APIs and microservices in Go, TypeScript, React and Angular.

I founded Nutrin, a practice-management SaaS for nutritionists: I designed, built and maintain the entire product. At Uliweb, the studio I've co-owned since 2022, I deliver websites and apps for real clients, with real deadlines, budgets and maintenance after launch.

I'm studying Computer Engineering, with a technical diploma in Systems Development.

Experience

Blendus Tecnologia em Saúde

1 ano e 7 meses

Full stack developer - Junior

June 2025 - Present

Florianópolis, Santa Catarina, Brasil

- Implement improvements and develop new front-end features (Angular) based on web application specifications.
- Develop and maintain APIs in Go, focusing on scalability, performance and sound architectural practices.
- Work with Elasticsearch, supporting data indexing and queries.
- Model and implement database queries.
- Write unit tests and help define code quality best practices.
- Document implementations to support ongoing maintenance and evolution.
- Collaborate with the development team on requirements analysis and the definition of technical solutions.

Full stack developer - Intern

November 2024 - June 2025 (8 months)

Florianópolis, Santa Catarina, Brasil

- Implement front-end and back-end improvements and new features based on specifications for web applications and Business Intelligence dashboards
- Support the implementation of database queries
- Assist with unit testing
- Document implementations

Nutrin

Founder

May 2024 - Present (2 years and 1 month)

Florianópolis, Santa Catarina, Brasil

Nutrin is nutrition software built for nutritionists, designed to make clinical routine efficient, simple and straightforward. Our mission is to remove the barrier between nutritionists and technology with an intuitive system that simplifies practice management.

My role is to lead product development, strategy and growth, making sure nutritionists have the best tools for their consultations.

Zedia

2 years and 1 month

Full stack developer - intern

August 2023 - November 2024 (1 year 4 months)

Palhoça, Santa Catarina, Brasil

- Develop web systems and APIs using React/TypeScript and Go.
- Document projects, defining requirements and business rules and creating wireframes in Jira and Figma.
- Document, develop and run tests using Qase and Postman.
- Maintain and evolve existing products.
- Collaborate on projects with Brazil's largest TV networks.
- Support clients (internal and external), handling requests related to their business needs (level 2 support).
- Responsible for implementing Scrum and leading the development team through Scrum events and artifacts, acting as Scrum Master.

Education

Universidade do Sul de Santa Catarina

Bachelor's degree, Computer Engineering
(Feb 2022 - Dec 2026)

SENAI/SC - Serviço Nacional de Aprendizagem Industrial

Integrated Technical Program, Systems Development
(Feb 2019 - Dec 2021)
